

ATLANTA PUBLIC CHARTER SCHOOL
PROSPECTIVE OPENING IN AUGUST 2015

MISSION

FA will provide elementary/middle school students with the academic preparation to compete globally. It is our goal to provide guidance that empowers students with the knowledge that they are capable of learning and can achieve success. FA's core values are rooted in the FACTS.

F A focused curriculum infused with fine arts, chess and technology. This rigorous, yet, unique approach to education will ensure student success by building self esteem, strong reading and math skills, and the ability to think critically.

A Students are able to **achieve** success through frequent assessments, and the accountability of those who play a role in the educational process.

C Collaboration between students, parents, faculty and the school's stakeholders is the key to successful integration of the arts, chess and technology into the common core curriculum, and to fulfilling the schools mission to prepare and educate children.

T Teachers who teach with Integrity, who teach the outlined curriculum and provide evidence of student achievement, who make full use of the instructional time, and believe that all students can achieve the objectives set before them.

S Shared commitment between the community, parents, teachers, administrators and other stakeholders to ensure that the school upholds its mission and vision to educate students and prepare them for the world
